

AMENDMENTS TO THE CLAIMS

Claims 1-12 (Cancelled)

Claim 13 (Newly Added): A polymer transistor arrangement, comprising:

a polymer transistor formed in and/or on a substrate including:

a first source/drain region;

a second source/drain region;

a channel region between the first and second source/drain regions;

a gate region; and

a gate-insulating layer between the channel region and a gate region; and

a drive circuit providing the source/drain regions and the gate region with electrical potentials such that a junction between at least one of the source/drain regions and the channel region is operated as a diode.

Claim 14 (Newly Added): The polymer transistor arrangement as claimed in claim 13, wherein the drive circuit provides the source/drain regions and the gate region with electrical potentials such that the junction between one of the two source/drain regions and the channel region is connected as a reverse-biased diode.

Claim 15 (Newly Added): The polymer transistor arrangement as claimed in claim 13, wherein the channel region and the source/drain regions are produced from a material such that the junction

between one of the source/drain regions and the channel region is one of a Schottky junction, an ip junction, an ip junction, and a pn junction.

Claim 16 (Newly Added): The polymer transistor arrangement as claimed in claim 13, wherein the drive circuit provides electrical potentials such that a magnitude of the gate voltage is greater than a magnitude of the voltage between the source/drain regions.

Claim 17 (Newly Added): The polymer transistor arrangement as claimed in claim 13, wherein the junctions between respective ones of the source/drain regions and the channel region are formed geometrically asymmetrically with respect to one another.

Claim 18 (Newly Added): The polymer transistor arrangement as claimed claim 13, wherein one of the source/drain regions is formed at least partially on the channel region and the other source/drain region is formed at least partially below the channel region.

Claim 19 (Newly Added): An integrated circuit arrangement having the polymer transistor arrangement as claimed in claim 13.

Claim 20 (Newly Added): The integrated circuit arrangement as claimed in claim 19, wherein the integrated circuit arrangement is a reference voltage circuit.
